Experience

Mission Technologies, a division of HII Software Engineer

Norfolk, VA
Sept 2021 - present

- Refactored frontend and Spring backend to reduce complexity and improve performance, across 4 modules, in a codebase of over 50,000 lines of code
- Designed and implemented RESTful APIs using Spring Boot, integrating with Vue/React frontend components and external services.
- Led monolith-to-microservices migration by defining service boundaries and extracting services while maintaining feature parity; improved deploy independence and reduced release risk.
- Built and deployed new features in a Dockerized microservices architecture, improving modularity and scalability while ensuring robust performance across multiple services
- Upgraded dependencies and remediated security findings through IntelliJ, resolving vulnerabilities and reducing CVE exposure while maintaining build stability.
- Migrated persistence layer to Spring Data JPA/Hibernate, reducing query complexity and improving endpoint latency by 200% and cutting DB load by 100% through the use of batching and caching
- Supported live product demos for four events, troubleshooting issues in real time and partnering with sales/PM to communicate technical value to prospects.
- Built distributed data pipelines and streaming services for a cloud-based Monte Carlo simulation platform, scaling support from ~100 to ~2,000 concurrent entities (20×); improved latency by 200%.
- Applied performance tuning and concurrency optimizations to a Java Spring Kafka/WebSocket backend for a Vue/Cesium map, lowering CPU utilization from ~100% to ~25% and reducing infrastructure demand.

SKILLS

Core Skills: Microservices, REST APIs, WebSockets, Distributed Systems, Data Structures & Algorithms, OOP, Full-Stack Web Development, SQL Databases, NoSQL Databases

Languages: Java, Scala, Python, JavaScript/TypeScript, SQL, C#, C++

Frameworks/Libraries: Spring Boot, Spring Data JPA, Vue.js, React, D3.js

Messaging/Data: Apache Kafka, Protocol Buffers

DevOps/Tools: Docker, Maven, Nginx, Git, Postman, CI/CD

Platforms: Linux (RHEL and Ubuntu), WSL, Windows

EDUCATION

Old Dominion University, College of Science
Bachelors of Science in Computer Science

Norfolk, VA
December 2020

Tidewater Community College
Associate of Science in Computer Science

Norfolk, VA
May 2018
